

Splitwise Lite

23PT01 - Aakash Velusamy

23PT14 - Kabilan S

OVERVIEW:

The Splitwise application is designed to simplify the way groups manage shared expenses. Whether you're going out for dinner with friends, sharing bills in a flat, or splitting travel costs, this app helps you keep track of who owes what.

KEY FEATURES:

- **Add Expenses:** Users can easily record expenses, specifying the payer and participants, ensuring that everyone's share is calculated automatically. This feature takes the hassle out of tracking who contributed what.
- **View Balances:** The app provides a clear overview of current balances, indicating who owes money and who is owed. This transparency promotes clarity among group members and helps maintain healthy financial relationships.
- **Simplify Debts:** To make settling up easier, the app offers a feature to simplify debts. This means users can see straightforward transactions that need to happen to settle balances, reducing complexity and confusion.
- **Settle Up:** When members decide to clear their debts, they can easily record transactions between debtors and creditors. This function keeps the balances up-to-date and reflects the real-time financial status of the group.
- **Visualize Expenses:** The app includes a graphical representation of debts, helping users visualize their financial interactions in a clear, engaging manner.

In summary, Splitwise is designed to make managing shared expenses a breeze, ensuring that you and your friends or family can enjoy each other's company without the stress of financial disagreements. It simplifies the process of tracking who owes what, allowing everyone to contribute fairly to shared bills. Ultimately, Splitwise is all about keeping your relationships intact while effortlessly handling the financial side of things.
